COMP9120 ASSIGNMENT COVERSHEET - GROUP ASSESSMENT

Assignment name: Harbour House: Hotel Reservations Database Management System

DECLARATION

We the undersigned declare that we have read and understood the *University of Sydney Academic Dishonesty and Plagiarism in Coursework Policy*, an, and except where specifically acknowledged, the work contained in this assignment/project is our own work, and has not been copied from other sources or been previously submitted for award or assessment. We understand that failure to comply with the *Academic Dishonesty and Plagiarism in Coursework Policy* can lead to severe penalties as outlined under Chapter 8 of the *University of Sydney By-Law1999* (as amended). These penalties may be imposed in cases where any significant portion of my submitted work has been copied without proper acknowledgement from other sources, including published works, the internet, existing programs, the work of other students, or work previously submitted for other awards or assessments. We realise that we may be asked to identify those portions of the work contributed by each of us and required to demonstrate our individual knowledge of the relevant material by answering oral questions or by undertaking supplementary work, either written or in the laboratory, in order to arrive at the final assessment mark.

COMP9120 Assignment Participation Summary of Group

[Group60]

**Note that the total of members' participation percentage must be 100%*

Member 1 Participation Percentage: 34%

Name: Jinxing Wu Student ID: 560555079

Summary of Contribution:

- I designed and implemented the seven-table PostgreSQL schema: Guest, RoomType, Room, Reservation, ReservationGuest, Staff and ReservationAudit.
- I defined primary and foreign keys, CHECK constraints and indexes, separated booking contacts from occupants, and modelled agreed prices, continuation links, staff accounts and audit history.
- I prepared sample data and core SQL, produced the RM diagram, and analysed functional dependencies, normalisation and design trade-offs.
- I wrote the database report sections and README.
- I developed ideas for the poster and showcase video, wrote and recorded the voiceover, and edited the video.
- I also reviewed the database design, report and prototype for consistency, and tested SQL results, integrity constraints, Python integration, rollback and concurrent bookings.

Member 2 Participation Percentage: 33%

Name: Tianyi Shen Student ID: 560025675

Summary of Contribution:

I was primarily responsible for developing the Python portions of the programme; for example, db.py was used to connect to the database, service.py was used to store business logic and services, and main.py handled the menus and main workflow. In the report, I was primarily responsible for completing the Python sections in sections 4.1, 4.4 and 4.5, and provided Python test evidence for section 4.6. During the video production process, I was responsible for simulating transaction tests and for editing the video.

Member 3 Participation Percentage: 33%

Name: Zirui Meng Student ID: 550593111

Summary of Contribution:

I am responsible for requirements, ER design, and business testing, which includes defining business rules, scopes, user operations, and ER diagrams, designing acceptance test cases for various scenarios like date boundaries and cleaning states, and executing integration and concurrency tests. I also write chapters 1 and 2 of the project report, design and create the final version of the poster.
